Mr. Mrs,

I am pleased to send you my curriculum vitae to be able to apply for my candidacy in your company. I would like to be part of a company like yours where my experiences, knowledge and skills could be effectively put to use.

I am confident that the combination of my education, experience and developed skill set makes me an ideal fit for the position. Also, I think he would be a valuable addition to your team and company.

Systems Engineer, specialist in project management, with Scrum Master and Scrum PO certification with more than 11 years of experience in projects and technology areas in the financial sector and software development, actively participating in the entire software development life cycle. software, leading teams and processes related to quality assurance, software development and requirements gathering. I had the opportunity to participate in projects in traditional (predictive) and agile (adaptive) frameworks, with different work teams, tools and technological platforms; which has allowed the development of soft skills to effectively lead and manage human talent and acquire significant technical knowledge in design, architecture and software development, automation of functional tests, non-functional tests, best practices and QA techniques.

I will be happy to explain in more detail everything that I can contribute there if we agree on an interview.

Thank you,

Jorge Eduardo Rodriguez Avellaneda
